EDUCATION

BSc Computer Science | University of Dundee | September 2024 – June 2028 (Expected)

- **Relevant coursework:** Programming fundamentals, web development, data structures, software engineering, algorithms
- **Technical skills:** Java, Python, C, C++, HTML, CSS, Bootstrap, object-oriented programming, problem-solving

Higher SQA Qualifications | Woodmill High School | 2022–2024

- **Computer Science, Mathematics, Physics, Chemistry, Biology, English**
-

TECHNICAL SKILLS

Programming: Python, Visual Basic, C++, C, Java (OOP, algorithms, data structures), HTML5, CSS3, Bootstrap

Software Engineering: Understanding of SDLC, version control, debugging methodology, code optimization

Core Competencies: Problem-solving, analytical thinking, rapid learning of new technologies, attention to detail

LEADERSHIP EXPERIENCE

Badminton Club Convenor (Incoming) | University of Dundee | September 2025–Present

- **Coordinating training sessions and activities for 150+ members, demonstrating project management and organizational skills transferable to software development teams**

School Prefect & Multi-Club Leader | Woodmill High School | 2022–2024

- **Dodgeball/Badminton Clubs:** Designed 50+ training sessions, increasing participation by 80% through strategic planning
- **Peer Tutor:** Led weekly Computer Science and Mathematics revision sessions, developing ability to explain complex technical concepts clearly
- **Astronomy Club:** Coordinated events for 20+ students, managing logistics and team collaboration

Scouts Member | Fife 114th Scout Group | 2010–2020

- Earned leadership and team coordination badges through 10-year commitment to collaborative activities
-

WORK EXPERIENCE

Food Service Roles | 2025–Present

- Pacamara Food and Drink (September 2025–Present): Responsible for food plating and prep in fast-paced café environment, ensuring quality standards and presentation consistency
- ESS Compass (June 2025–September 2025): Collaborated with team to serve 300+ daily customers across multiple departments, demonstrating strong teamwork and multitasking under pressure
- Consistently follow strict procedural guidelines and quality standards, relevant to software development protocols
- Balance work commitments with full-time Computer Science studies, demonstrating strong time management

Polling Officer | Fife Council | July 2024

- Maintained compliance with official regulations during intensive 14-hour shift, ensuring accuracy and integrity
-

WHY SOFTWARE ENGINEERING AT JPMORGAN CHASE

I'm passionate about technology innovation and eager to understand how software engineering drives impact in FinTech. As a first-year Computer Science student, I'm building strong technical foundations in Java and software development while actively developing leadership skills through managing 150+ club members. My experience in collaborative environments—from peer tutoring in Computer Science to coordinating diverse teams—has strengthened my communication abilities and inclusive approach to teamwork. I'm excited to learn from JPMorgan Chase's Technology teams, contribute to collaborative projects, and discover how innovation meets community impact in financial technology.
